Dear Mr. Tan

Thank you for conducting the Praxis Life@Play programme for 80 of our Secondary Three Normal students from 19th – 21st May 2004.

Praxis was an innovative way to teach Financial Literacy to bring across a very important lifeskill. From the feedback that we have received, majority of the students who went through this course found that your Praxis programme is a useful tool to learn about money management.

The gameboard enables our students to experience various situations regarding employment, property, stocks, insurance etc. It also teaches them to think of whether a purchase is a NEED or a WANT before they spent their money.

Once again, I thank you and your trainers for the three useful sessions of Praxis.

Best Regards

M. Chua
